System Manager - by Daniel Abay

~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~

Prerequisites before running:

----

in order to run the program you need to install:

pip3 install pyautogui (for the screenshot feature).

I also recommands to run it on Windows Terminal and not cmd. (for console color issues)

##
#####

also on the 'client.py' you need to change the ip address

to the ip address that your host are running.

##

Run the server.py

after that run the client.py

to start. (it does not matter what goes first.)

Enjoy, and Thank You.
